JUSTIN DELABARRE

Data Analyst / Data Scientist

5 years of experience in Data within a B2B SaaS environment. Specialised in predictive modelling, data pipelines and business analytics on Azure Databricks. Passionate about turning data into operational decisions.

WORK EXPERIENCE

Cegid

Sep. 2020 – Present · 5 years

Data Analyst / Data Scientist

- Deployed Machine Learning models in production on Azure Databricks (churn, scoring, segmentation) for commercial and marketing teams.
- Built and maintained end-to-end data pipelines (ingestion, transformation, exposure) using PySpark and Delta Lake.
- Delivered business analyses and operational recommendations to business teams — summarised in Power BI dashboards.
- Cross-functional collaboration with Product, Marketing and Sales teams to translate business needs into data solutions.

Intersport France

2019 – 2020 · 1 year

Junior Data Scientist — Apprenticeship

- Conducted customer and product studies: scoring, segmentation, lifecycle analysis — using SAS.
- Collected open data via web scraping and developed predictive models (Machine Learning & Deep Learning) in Python.
- Built data visualisation dashboards on ClicData to monitor product performance.

French Ministry of Social Affairs and Health

2018 · 3 months

Economic Research Analyst — Internship

- Contributed to the PQE report by producing sector-specific thematic briefs.
- Performed statistical analyses on SAS (social and public health data).
